## MAIN COURSES

### FASHION DESIGNING

The fashion design program provides the creativity and flair of an art together with the technical knowledge base vital to mass production.

Students are put through an intensive training, which prepares them to fabricate for a wide range of products from the ready to wear and institutional garments to the up- market trade.

The fashion design programme equips you with the creative thinking along with the essential technical knowledge.

The curriculum covers the development of garments, technical aspects like Art, Pattern making, Illustration, Grading, and Garment construction, Draping, Merchandising and Computer Aided designing.

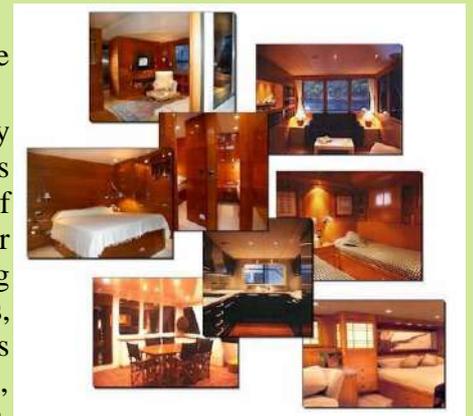

The Course has been designed to give an overall comprehensive exposure to all aspects designing and manufacturing of garments. The fashion design program provides the creativity and flair of an art together with the technical knowledge base vital to mass production.

### INTERIOR DESIGNING

Interior Designing is an art of planning and arranging different elements of an interior like the furniture, articles, furnishing, lighting and the more technical aspects of flooring, partitions etc. so as to convey the twin aims of beauty and utility.

Interior Design is a service profession, dealing largely with people and their needs. The demand for design services has grown rapidly. With that growth has come a wide range of specialties in both residential and non-residential design. Our graduates/diploma holders are pursuing active careers designing the following types of projects:-Residences, offices, restaurants, Hotels, spas and resort health-related facilities retail spaces exhibits places of worship, Schools and college campuses, museums, theaters, government facilities, transportation terminals

Students should be design-oriented. They must have the ability to express ideas by free-hand drawing, architectural drafting, computer-aided design (CAD), physical and electronic models and other graphic media. They must be able to present their ideas visually and verbally. They should be knowledgeable and conversant in historic and contemporary architectural and interior design areas.

### TEXTILE DESIGNING

Textile design is a unique and exciting course that is firmly positioned in the area of printed, woven, knitted and stitched textile design yet not restricting to a traditional understanding of age old practices. Specialist design workshops with a multi-disciplinary approach, production and a strict vigilance towards minimizing the impact of fabric design and production on the environment, all make this specialized field a coveted career option.
